

# HIV and Latinos

Not all Hispanics/Latinos with HIV are getting the care they need.  
**252,400 Hispanics/Latinos had HIV in the US in 2015**

[www.cdc.gov/actagainstaids](http://www.cdc.gov/actagainstaids)

\* Had 2 viral load or CD4 tests at least 3 months apart.

\*\* A person with HIV who takes HIV medicine as prescribed and gets and stays virally suppressed or undetectable can stay healthy and has effectively no risk of transmitting HIV to HIV-negative partners through sex. Based on most recent viral load test.

**Get Tested. Get in Care. Stay in Care. Be Healthy.**

Based on the most recent data available in October 2018.
