

Floods Happen. Lessen the Loss.

Loss of life and property to flooding is the most common, yet preventable, natural disaster in the United States. The following coloring pages were created to increase the understanding of flooding and flood safety for students, educators, and others.

Each of the following six sheets are designed to be colored individually and assembled into a complete poster, just like the big Flood Education Poster. The characters, **Highwater Mark** and his dog, **Noah**, also have six different fun sheets for you to enjoy!

"Floods Happen. Lessen the Loss" is a project of the Nurture Nature Foundation. NNF is a non-profit organization working with the National Oceanic and Atmospheric Administration and its National Weather Service offices to present a comprehensive, replicable flood education campaign. The campaign offers general flood education messages and focuses especially on increasing the use and awareness of flood forecasting tools developed by NOAA/NWS.
