Cheshire Cat Pumpkin Carving Template

Cheshire Cat Pumpkin Carving Template

Instructions

1. There are two ways to transfer your design onto the pumpkin. One is to copy it freehand onto a clean, dry pumpkin with a water-based marker (mistakes can be easily corrected with a paper towel). The other is to tape your template to the pumpkin, then score the design into the skin by poking holes through the template with a nail or plastic poking tool (available in some pumpkin-carving kits).
2. Carve by starting at the center of your design and working outward (this avoids putting pressure on areas already carved). Begin with the innermost and smallest details. As each shape loosens up, gently push it out of the pumpkin with a finger or a dull pencil point (a good job for young kids).
3. Lastly, put your pumpkin in a place of honor (away from flammables), and remember to blow out all candles before you go to sleep.

Tip: If you cut something you didn't intend to, perform an ad hoc pumpkin surgery: Stick a toothpick through the flesh side of the piece and fit it back into place.

Cruella de Vil Pumpkin Carving Template

Materials

Hand drill, rotary tool or very small craft knife

Instructions

1. There are two ways to transfer your design onto the pumpkin. One is to copy it freehand onto a clean, dry pumpkin with a water-based marker (mistakes can be easily corrected with a paper towel). The other is to tape your template to the pumpkin, then score the design into the skin by poking holes through the template with a nail or plastic poking tool (available in some pumpkin-carving kits).
2. Carve by starting at the center of your design and working outward (this avoids putting pressure on areas already carved). Begin with the innermost and smallest details. Consider using a hand drill, rotary tool or very small craft knife to carve the smallest details. **These tools are only intended for use by a grownup.** As each shape loosens up, gently push it out of the pumpkin with a finger or a dull pencil point (a good job for young kids).

Tip: If you cut something you didn't intend to, perform an ad hoc pumpkin surgery: Stick a toothpick through the flesh side of the piece and fit it back into place.

3. Lastly, put your jack-o'-lantern in a place of honor (away from flammables), and remember to blow out all candles before you go to sleep.

Doc McStuffins Pumpkin Template

Doc McStuffins Pumpkin Template

Instructions:

1. There are two ways to transfer your design onto the pumpkin. One is to copy it freehand onto a clean, dry pumpkin with a water-based marker (mistakes can be easily corrected with a paper towel). The other is to tape your template to the pumpkin, then score the design into the skin by poking holes through the template with a nail, pin, or plastic poking tool (available in some pumpkin-carving kits).
2. Carve by starting at the center of your design and working outward (this avoids putting pressure on areas already carved). Begin with the innermost and smallest details. As each shape loosens up, gently push it out of the pumpkin with a finger or a dull pencil point (a good job for young kids).

Tip: If you cut something you didn't intend to, perform an ad hoc pumpkin surgery: Stick a toothpick through the flesh side of the piece and fit it back into place.

3. Lastly, put your jack-o'-lantern in a place of honor (away from flammables), and remember to blow out all candles before you go to sleep.

3. Lastly, put your jack-o'-lantern in a place of honor (away from flammables), and remember to blow out all candles before you go to sleep.

1. Attach the printable to your pumpkin with tape. You may have to fold or trim the edges of the paper to form it around the pumpkin.
2. Use a push pin or tack to poke holes through the pattern and into the pumpkin to outline the black areas of your design.
3. Remove the pattern from your pumpkin.
4. Cut along the tack holes to carve out the black areas.
5. Show it off to all of your friends!

Jack Skellington Template - Instructions

1. There are two ways to transfer your design onto the pumpkin. One is to copy it freehand onto a clean, dry pumpkin with a water-based marker (mistakes can be easily corrected with a paper towel). The other is to tape your template to the pumpkin, then score the design into the skin by poking holes through the template with a nail or plastic poking tool (available in some pumpkin-carving kits).
